### **About the course:**

In recent years security issues has become important also to Baltic and Nordic countries. World is coping such challenges as migration, conflicts based on different cultural backgrounds, cyber-attacks and other new challenges. This leads to fact that there is need for high quality training for young security specialists. Those specialists need knowledge and skills not only in subjects traditionally known as necessary for Security specialist, but also be able to manage the team and stress situations, be good intercultural communication specialist and cope with cyber-security challenges.

The course comprises theoretical programme, seminars as well as a set of interesting intensive practical lessons. During the two week course students will gain also practical knowledge in person's and organisation's security. Student will gain knowledge of assessment of security tactics for guarded sites, basics of tactical planning and implementation methods for threat prevention and their legal regulation; comprehensive knowledge of facts, theory and correlations necessary for carrying out work related tasks, personal growth and development, public participation and social integration.
